

Mobile App Development task

Online Complaint Management System

Tech Stack: Android Tool Kit/iOS

Project Description:

This project provides an intelligent system where the users can place complaints about the cities. This app will let people add location, add the photo and its description about the problem. This will help resolve issues like overflowing drainage, leakages, street light issues, etc.

There would be two modules that are the User and the Admin. The users would register themselves on this application. And then, they can log in to the application and make use of it to improve our country and the safety of our people. The admin can see all the complaints and the users who placed them. The admin can then take the necessary actions.
